### ***Allowable Subject Matter***

Claims 1-11 are allowed.

portion of the PCB, a second portion of the PCB being reserved for an input/output (I/O) module to be added at a later time, a first connector that provides connection of the PCB to a primary bus of a computer system, a bridge circuit that bridges the primary bus of the computer system to a secondary bus on the PCB, the secondary bus providing a communication path between the processor module and the I/O module that is to be added at a later time, a second connector coupled to the secondary bus to enable a separate I/O card to be connected to the PCB and to temporarily serve as the I/O module of the PCB to permit prototyping of the processor module in the absence of an I/O module in said second portion of the PCB; as per claims 6-11, the prior art of record does not disclose, teach, or suggest a method of prototyping an adapter card intended to have an I/O module in a second section of the card (or equivalent PCB), comprising the particular features recited in combination with the steps so described.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
